As we understand, the eProject is a structured, step-by-step learning environment that effectively simulates classroom and lab-based learning, transitioning academic knowledge into practical application. It offers a hands-on experience that brings the learning process to life on our devices. Through this project, we were able to:

- ✓ Practice using a ladder approach, progressing step by step.
- ✓ Build a more complete and sophisticated application.
- ✓ Apply specific utilities in user-designed applications.
- ✓ Integrate individual programs into a cohesive, functional system.
- ✓ Learn implementation of key concepts in a staged and manageable manner.
- ✓ Enhance our technical skills and personal value.
- ✓ Engage with real-life projects and situations.
- ✓ Tackle realistic scenarios that foster the development of complex and practical solutions.
- ✓ Benefit from valuable mentoring and guidance through email support.

We extend our sincere gratitude to our professor and fellow classmates for their continued support and encouragement throughout this project. Although we encountered challenges and made a few mistakes during the development process, we view these experiences as stepping stones for further learning in the world of web development.

We also deeply appreciate the resources and demo project provided by APTECH India, which offered us a clearer perspective and a more immersive experience. This project has greatly contributed to our growth, and we are motivated to continue learning and improving our skills as we move forward toward future success.

Yours sincerely,

Team Group 02

Synopsis

The objective of this eProject is to provide students with a practical opportunity to work on a real-life application, bridging the gap between theoretical knowledge and practical implementation. This project allows learners to develop a more robust and comprehensive application, reflecting real-world development scenarios.

Rather than focusing on direct instruction, this eProject is designed to immerse students in a realistic environment where they can apply their knowledge of tools and technologies, particularly in the context of ReactJS. It serves as a platform to reinforce concepts learned during the module and put them into meaningful practice.

Before starting the project, students are encouraged to revisit relevant chapters and concepts to ensure a solid foundation. The project is intended to be completed during lab sessions, where faculty assistance is available if needed.

A clear understanding of the subject matter is essential to successfully complete the project. Students are expected to follow the project guidelines and solve assignments as per the requirements provided.

For any queries or clarifications regarding the project objectives or implementation, students are advised to reach out to the eProjects Team for guidance and support.

Chapter 1. Problem Definition

In today's increasingly competitive manufacturing sector-especially within garment factories-businesses face significant challenges in managing their workforce effectively. As production demands rise and order cycles become shorter, factory owners and managers must coordinate employee attendance, salary calculation, leave requests, and daily operations with a high level of accuracy and efficiency. However, many small and medium-sized garment workshops still rely on manual processes such as paper-based attendance sheets, handwritten salary calculations, or basic Excel files, which are prone to errors, delays, and data inconsistencies.

Traditional workforce management methods not only consume valuable time but also lack transparency, often resulting in disputes over payroll, inaccurate attendance records, and difficulties in monitoring employee performance. Additionally, the absence of a centralized system makes it challenging for managers to track real-time information, approve leave requests promptly, or forecast workforce needs. Employees themselves may struggle to access their attendance history, salary breakdown, or leave balances, leading to confusion and reduced satisfaction.

Recognizing these challenges, this project introduces a comprehensive Employee Management System tailored specifically for garment workshops. The solution integrates both a React-based web application for administrators and a mobile application for employees. The platform aims to streamline attendance tracking, automate payroll calculation, simplify leave management, and enhance communication between workers and management. By providing an efficient and user-friendly digital ecosystem, the system seeks to improve operational productivity, reduce administrative burden, and support more transparent and accurate workforce management.

Chapter 2. Design Requirements Specification

2.1 Project Objective

The primary objective of this project is to provide a practical, real-world development experience focused on workforce management within a garment workshop environment. Rather than limiting the project to a single type of functionality, the system aims to address the core operational challenges faced by manufacturing businesses-specifically the need for accurate attendance tracking, transparent payroll calculation, and efficient leave management. The system is designed to streamline administrative processes, reduce manual errors, and improve communication between employees and management. It also ensures that both administrators and workers have access to clear, real-time information through web and mobile platforms.

This includes:

- Employee attendance tracking through a digital check-in/check-out system.
- Automated payroll calculation based on working hours, overtime, leave deductions, and predefined salary structures.
- Leave management module allowing employees to request leave and managers to approve or reject requests.
- Employee profile and contract management including personal details, work history, and position data.
- Shift scheduling to help managers allocate manpower efficiently.
- Mobile access for workers to view attendance records, salary breakdowns, and leave status.
- Web-based administrative dashboard for managers to oversee operations, generate reports, and make data-driven decisions.

2.2 Technology Stack

This project follows the approved development guidelines and combines both web and mobile technologies to deliver a complete workforce management solution.

Frontend (Web Application)

- React.js - For building dynamic, component-based user interfaces.

Mobile Application

- Flutter

Backend

- Spring Boot

Database

- MySQL 8.0 - For managing employee data, attendance logs, payroll records, and leave information.

Additional Tools & Services

- JWT Authentication - For secure login and role-based access control.
- RESTful API design - For communication between the web/mobile clients and backend server.
- Git & GitHub - For version control and collaboration.

Chapter 3. Database Design

3.1 Relational Model of Database

3.2 Data Description of Tables

1. TbRole

Field Name	Data Type	Key	Description
role_id	int	PK	Auto-increment unique identifier for each role
name	varchar(100)	Unique	Role name
description	text		Description of the role

2. TbLeaveReason

Field Name	Data Type	Key	Description
leave_reason_id	int	PK	Auto-increment unique identifier for leave reason
reason	varchar(255)		The reason for leave
description	text		Additional explanation

3. TbSkillLevel

Field Name	Data Type	Key	Description
skill_level_id	int	PK	Unique skill level identifier
name	varchar(100)		Skill level name
description	text		Description of the skill level

4. TbDepartment

Field Name	Data Type	Key	Description
department_id	int	PK	Unique identifier for department
name	varchar(100)		Department name
manager_id	int	FK	References TbUser.user_id
description	text		Description

5. TbLine

Field Name	Data Type	Key	Description
line_id	int	PK	Unique production line identifier
department_id	int	FK	References TbDepartment.department_id
parent_id	int	FK	Self-reference to parent line
level	int		Management level (starts at level 3)
name	varchar(100)		Line name
description	text		Description
manager_id	int	FK	References TbUser.user_id
created_at	datetime		Created timestamp

6. TbUser

Field Name	Data Type	Key	Description
user_id	int	PK	Unique user ID
full_name	varchar(255)		Full name of user
email	varchar(255)	Unique	Email address
password_hash	varchar(255)		Hashed password
phone	varchar(20)		Phone number
gender	bit		0 = Female, 1 = Male
role_id	int	FK	References TbRole.role_id
department_id	int	FK	References TbDepartment.department_id
line_id	int	FK	References TbLine.line_id
face_data	text		Face recognition raw data
salary_type	varchar(20)		Salary type (ProductBased / TimeBased)
base_salary	decimal(10,2)		Base salary
skill_level_id	int	FK	References TbSkillLevel.skill_level_id
hire_date	date		Hiring date

status	varchar(20)		Active / Inactive / Terminated
created_at	datetime		Created timestamp

MODULE A – TIME & ATTENDANCE

7. TbWorkSchedule

Field Name	Data Type	Key	Description
schedule_id	int	PK	Unique schedule ID
user_id	int	FK	References TbUser.user_id
date	date		Work date
shift_start	time		Start time
shift_end	time		End time
is_holiday	bit		0 = normal day, 1 = holiday

8. TbAttendance

Field Name	Data Type	Key	Description
attendance_id	int	PK	Attendance record ID
user_id	int	FK	References TbUser.user_id
date	date		Attendance date
time_in	time		Check-in time
time_out	time		Check-out time
status	varchar(20)		success, late, manual, error
reason	text		Reason for manual or error attendance
manual_updated_by	int	FK	References TbUser.user_id
created_at	datetime		Timestamp of record creation

9. TbLeaveRequest

Field Name	Data Type	Key	Description
request_id	int	PK	Unique leave request ID
user_id	int	FK	References TbUser.user_id
leave_reason_id	int	FK	References TbLeaveReason.leave_reason_id
type	varchar(20)		ShortTerm / LongTerm / Maternity / Accident / Other
start_date	date		Leave start date
end_date	date		Leave end date
reason	text		Description of leave reason
comment	text		Internal comments
status	varchar(20)		pending, confirmed, approved, rejected
confirmed_by	int	FK	References TbUser.user_id
approved_by	int	FK	References TbUser.user_id
reject_reason	text		Rejection reason
created_at	datetime		Created timestamp

MODULE B – OVERTIME & PROPOSALS

10. TbProposal

Field Name	Data Type	Key	Description
proposal_id	int	PK	Unique proposal ID
type	varchar(30)		SalaryIncrease / PositionChange / SkillLevelChange
proposer_id	int	FK	User who submits proposal
target_user_id	int	FK	The user being proposed for
details	nvarchar		Proposal details
reason	text		Reason for proposal

status	varchar(20)		pending, confirmed, approved, rejected
approved_by	int	FK	Approver ID
reject_reason	text		Rejection explanation
created_at	datetime		Created timestamp

11. TbOvertimeRequest

Field Name	Data Type	Key	Description
request_id	int	PK	Unique overtime request ID
factory_manager_id	int	FK	References TbUser.user_id
department_id	int	FK	References TbDepartment.department_id
overtime_date	date		Overtime date
start_time	time		Default 17:00
end_time	time		End time
overtime_time	float		Total overtime hours
status	varchar(20)		pending / open / processed / rejected / expired
details	text		Reason or notes
created_at	datetime		Created timestamp

12. TbOvertimeRequestDetail

Field Name	Data Type	Key	Description
detail_id	int	PK	Record ID
request_id	int	FK	References TbOvertimeRequest.request_id
line_id	int	FK	References TbLine.line_id
num_employees	int		Number of employees requested

13. TbOvertimeTicket

Field Name	Data Type	Key	Description
------------	-----------	-----	-------------

ticket_id	int	PK	Unique ticket ID
manager_id	int	FK	Manager who creates ticket
request_id	int	FK	References TbOvertimeRequest.request_id
reason	text		Reason for ticket
status	varchar(20)		pending / submitted / confirmed / approved / rejected
confirmed_by	int	FK	References TbUser.user_id
approved_by	int	FK	References TbUser.user_id
created_at	datetime		Created timestamp

14. TbOvertimeTicketEmployees

Field Name	Data Type	Key	Description
id	int	PK	Unique record ID
overtime_ticket_id	int	FK	References TbOvertimeTicket.ticket_id
user_id	int	FK	References TbUser.user_id
line_id	int	FK	Line assignment
status	varchar(20)		pending / accepted / rejected

MODULE C – PAYROLL & PRODUCTION

15. TbProduction

Field Name	Data Type	Key	Description
production_id	int	PK	Production record ID
department_id	int	FK	References TbDepartment.department_id
product_count	int		Total products produced
DOP	date		Date of production
unit_price	decimal(15,1)		Unit price per product

created_at	datetime		Created timestamp
------------	----------	--	-------------------

16. TbPayroll

Field Name	Data Type	Key	Description
payroll_id	int	PK	Unique payroll batch ID
month	date		Payroll month
department_id	int	FK	References TbDepartment.department_id
total_salary	decimal(12,2)		Total calculated salary
details	nvarchar		Detail description
status	varchar(20)		pending / balanced / approved / rejected
created_by	int	FK	Creator ID
approved_by	int	FK	Approver ID
balance_note	text		Balancing notes
created_at	datetime		Timestamp

17. TbReservedPayroll

Field Name	Data Type	Key	Description
reserved_id	int	PK	Unique reserved payroll ID
payroll_id	int	FK	References TbPayroll.payroll_id
reserved_amount	decimal(12,2)		Reserved amount
details	nvarchar		Description
created_by	int	FK	Creator ID
created_at	datetime		Created timestamp

18. TbEmployeePayroll

Field Name	Data Type	Key	Description
detail_id	int	PK	Payroll detail ID

payroll_id	int	FK	References TbPayroll.payroll_id
user_id	int	FK	References TbUser.user_id
base_salary	decimal(15,2)		Base salary
product_bonus	decimal(15,2)		Production bonus
overtime_pay	decimal(15,2)		Overtime earnings
allowance	decimal(15,2)		Allowances
deduction	decimal(15,2)		Deductions
total_pay	decimal(15,2)		Final calculated salary
note	text		Notes
created_at	datetime		Timestamp

SYSTEM TABLES

19. TbUserHistory

Field Name	Data Type	Key	Description
history_id	int	PK	Change history record ID
user_id	int	FK	References TbUser.user_id
field_changed	varchar(100)		Field that was modified
old_value	text		Previous value
new_value	text		Updated value
updated_by	int	FK	User who made the change
timestamp	datetime		Updated timestamp

20. TbNotification

Field Name	Data Type	Key	Description
notification_id	int	PK	Unique notification ID

recipient_id	int	FK	User who receives the notification
type	varchar(20)		Notification type
message	text		Notification content
sent_date	datetime		Date sent
status	varchar(10)		sent / read

21. TbPasswordResetToken

Field Name	Data Type	Key	Description
token_id	int	PK	Reset token ID
token	varchar(500)	Unique	Token string
user_id	int	FK	References TbUser.user_id
expiry_date	datetime		Expiration datetime
used	bit		0 = unused, 1 = used
created_at	datetime		Created timestamp

FACE RECOGNITION MODULE**22. TbFaceTraining**

Field Name	Data Type	Key	Description
face_id	int	PK	Unique face training ID
user_id	int	FK	Associated user
trained_by_user_id	int	FK	Trainer ID
confidence	numeric(5,4)		Training confidence score
is_trained	bit		Training completion flag
model_version	varchar(50)		Model version used
face_image_path	varchar(500)		Image file path

face_embedding	varbinary		Encoded facial embedding
notes	nvarchar		Training notes
created_at	datetime		Created timestamp
training_date	datetime		Training date
updated_at	datetime		Last update timestamp

23. TbFaceScanLog

Field Name	Data Type	Key	Description
id	bigint	PK	Unique scan record ID
user_id	int	FK	User scanned
matched_face_id	int	FK	References TbFaceTraining.face_id
attendance_id	int		Related attendance record
scan_type	varchar(20)		CHECK_IN or CHECK_OUT
is_recognized	bit		System recognition flag
is_matched	bit		Whether user matches registered face
matched_confidence	numeric(5,4)		Confidence level
scan_image_path	varchar(500)		Scan image path
scan_date	datetime		Scan date
created_at	datetime		Created timestamp

Chapter 7. Interface of Application

7.1 Login

7.1.1 Login

The login interface for MayPayHR features a white card centered on a purple gradient background. The card displays the MayPayHR logo, the text 'Đăng nhập hệ thống', and input fields for 'Email or Phone Number' (containing 'admin@admin.com or '0123456789') and 'Password'. A 'Forgot Password?' link is located to the right of the password field. A blue 'LOGIN' button is positioned below the fields, and a link to 'Register now' is at the bottom of the card.

Task Sheet Review 3

Sr. No.	Task	Actual Start Date	Actual Days	Teammate Names	Status
1	Time Attendance – Face Enrollment (HR) - HR upload face data (POST /user/face-data) - Validate image quality (face detected = true) - Update User.face_data - Notify employee	18/11/2025	30 days	Tien	Completed
2	Time Attendance – Daily Sync Job - Auto-sync offline attendance (cron job) - Retry failed sync - Log sync history (GET /attendance/sync-log) - Notify HR on repeated failures	18/11/2025	30 days	Tien	Completed
3	Time Attendance – Late Report Generator - Get all late attendance per department - Categorize reasons - Export Excel (GET /attendance/late-report?month=) - Auto-send to HR email	18/11/2025	30 days	Tien	Completed
4	Time Attendance – Mobile Check-In (Optional) - Allow mobile face-scan with location - Validate GPS radius - Save AttendanceMobile - Notify Manager for approval	18/11/2025	30 days	Tien	Incomplete
5	Time Attendance – Monthly Summary Dashboard - Chart of Present / Late / Leave / OT - Filter by team/department - Redis cache refresh every 1 hour - Export snapshot	18/11/2025	30 days	Tien	Incomplete
6	Payroll – Auto Calculate Daily Salary Rate - Pull base_salary from User - Calculate per-hour/per-day rate - Save to PayrollRate table - Notify Payroll team	18/11/2025	30 days	Tu	Completed

7	Payroll – Merge Overtime Into Payroll - Aggregate Approved OvertimeTicket - Apply OT multiplier - Update PayrollDetail - Notify Director	18/11/2025	30 days	Tu	Completed
8	Payroll – Deduct Leave Days - Pull approved leaves - Deduct unpaid leave - Recompute net salary - Update PayrollHistory	18/11/2025	30 days	Tu	Incomplete
9	Payroll – Publish Payslip (Employee Self-Service) - Generate payslip by employee - Allow download PDF - Track viewed/unviewed status - Notify via app	18/11/2025	30 days	Tu	Incomplete
10	Payroll – Yearly Payroll Summary (HR) - Report by month/year - Include bonus, OT, leave deductions - Export Excel/PDF - Notify HR automation queue	18/11/2025	30 days	Tu	Incomplete
11	Overtime – Request Overtime Assignment (Factory Manager) - Create overtime request, check available staff (GET /user/available) - Save OvertimeRequest (status = pending), notify Manager	18/11/2025	30 days	Phu	Completed
12	Overtime – Create Overtime Ticket (Manager) - Build ticket from request or new - Select employees, validate not on leave (GET /leave/requests) - Save OvertimeTicket, notify Factory Manager	18/11/2025	30 days	Phu	Completed
13	Overtime – Confirm Overtime Ticket (Factory Manager) - Review tickets, confirm/reject (PUT /assignment/confirm-overtime/{ticket_id}) - Update status → confirmed/rejected	18/11/2025	30 days	Phu	Completed

14	Leave – Submit Leave Request (Employee) - Submit via Flutter (POST /leave/request) - Validate 12 days/year & ≤ 5 people/day per team - Save LeaveRequest (pending) or notify Manager/Factory Manager if conflict	18/11/2025	30 days	Phu	Incomplete
15	Leave – Manager Confirm Leave Request - Manager reviews, confirm/reject (PUT /leave/confirm/{request_id}) - Add comment, notify Factory Manager	18/11/2025	30 days	Phu	Incomplete
16	Proposal – Propose Salary Increase - Factory Manager proposes salary (checks 12-month rule) - Save Proposal (type=salary), notify Director	18/11/2025	30 days	Nhi	Completed
17	Proposal – Propose Position Change - Propose new role/department/salary (type=position) - Notify Director	18/11/2025	30 days	Nhi	Incomplete
18	Proposal – Propose Skill Level Change - Manager proposes skill-level change (type=skill) - On approval auto-create related salary proposal	18/11/2025	30 days	Nhi	Incomplete
19	Proposal – Approve Proposals (Factory Director) - Director reviews proposals, approve/reject (PUT /assignment/approve/{proposal_id}) - If approved, notify HR & Payroll to update User.base_salary	18/11/2025	30 days	Nhi	Completed
20	Proposal – Proposal History & Log - Track proposal changes - Save ProposalHistory records - Notify Managers on final approval	18/11/2025	30 days	Nhi	Completed
21	Task Sheet Review 3	05/12/2025	4 days	Nhi	Completed
